Review of PRC Action Items

Col Jared A. Astin

Dean, Civil Engineer and Services School

Integrity - Service - Excellence

Overview

- 2002 PRC Items Open
- 2003 PRC Items Open
- Status of Facilities Design Course

2002 PRC Items Open

- PRC 02-02 Create an officer mid-term career development course OPR: AFIT

- PRC 02-04 Develop a readiness flight officer course OPR: AFCESA

2003 PRC Item Open

- PRC 03-03 Develop proposed “bodies of knowledge”, course plan and method of instruction for the Facilities Design course OPR: AFIT
- PRC 03-04 Develop standard “bodies of knowledge” and query MAJCOM/CEs on proposed method of instruction for a GeoBase seminar OPR: ILEI
- PRC 03-05 Send out CE Commander’s Course “bodies of knowledge” to MAJCOM/CEs for review of content and relevance OPR: AFIT

2003 PRC Item Open-Continued

- PRC 03-06 Review the content of On-scene Commander's course, Fire Marshall course and CE Commander's course to ensure excessive redundancy is not occurring, investigate possibilities of scheduling course in concert with each other to minimize impact on new BCEs OPR: AFCESA/AFIT

Status of Facilities Design Course

- PRC Action Item 03-03
- Have made limited progress
  - Architect that was going to work course departed early
  - IMA that was going to work course hired to work MILCON
- IMA has now started working two days a week trying to develop course
- Is going to take longer to develop course than originally thought

Facility Design Course

- Old course was a 4-week resident course
- An additional 4-week resident course would severely impact other course

- Challenge is how to educate on limited budget without decreasing the level of education

Satellite

Web-based

?

Status-continued

- Direction we are exploring is a hybrid course
  - Exploit Distance Learning technology
  - Provide hands-on, face-to-face practicum
- Web-based training
  - Architectural fundamentals
  - Electrical fundamentals
  - Mechanical fundamentals
  - Structural fundamentals
  - Building code workshop
- One-two week resident portion
  - Systems-integration
  - Design review
- Add additional topics
  - Sustainable design
  - Energy conservation

Recommendation

- Continue to develop Facilities Design course with a Web-base and resident component
- Target first course in FY05
- Update MAJCOM CEs at 2004 SLMs
